# Select 80mm Card Receipt Printer

The **Card Operator (CO)** is authorized to install/select the 80mm Card Receipt Printer.

> **Application Tip**
>
> If you are a Card Operator (CO), you have the option to choose Select 80mm Card Receipt Printer. OTCnet offers the option to install an 80mm Card Receipt Printer for card processing receipts, they will be printed on 80mm (3.125 inch) paper.
>
> Before you can select your 80mm printer, ensure:
>
> - Your printer must be installed on your workstation or network. If you do not install the 80mm printer, card receipts will be sent to your default Windows printer.
>
> - The OLB is not started. If it is started, you receive a message that the OLB is running and you will not be able to access the OLB menu until you stop the OLB.
>
> - You must have the latest OLB version to select the 80mm printer.
>
> If your agency uses check processing and/or deposit processing, check or deposit items will print to the Windows default printer, not the 80mm printer.

> **Application Tip**
>
> For the 80mm printer driver installation process, review the system requirements document (https://www.fiscal.treasury.gov/files/otcnet/OTCnet-SysReq.pdf) for additional information.

To select the 80mm Card Receipt Printer, complete the following steps:

1. Double-click the **Start OTCnet Local Bridge** icon located on the terminal's desktop.

   Or

   Click **Start>Programs>Start OTCnet Local Bridge**.

2. The *OTCnet Local Bridge Startup* window appears. Click the **File** menu, and then select **Select 80mm Card Receipt Printer.**

3. The *Select 80mm Card Receipt Printer* window appears. Select a printer and click **Confirm**.

4. The *"You have successfully chosen XXX Printer as your 80mm card receipt printer"* message appears. Click **OK** to return to the OLB Login page.
